

UNLOCKING THE ABILITY TO SUCCEED

Mr. Lewis,

I just wanted to drop you a letter and let you know that im out here continuing in the field. I love my work. I didn't start off in the field right away. It was hard getting in with my priors but god opened a door for me a few months out and ive been doing it ever since. This is me (above), working on a Macy's project. We changed over all their wireless terminals. I work for a company based in the East coast and I am one of a couple of technicians they have out here in California and we just finished a Walgreen's (below) project. Im doing everything I learned in your class and then some. I just want to thank you for giving me the opportunity. I am going for my 2nd. try at taking the union test. The electricians union has a apprenticeship program, Sound and Communications and im going back and forth between doing the Sound and Communications/Commercial Electrical Wiring. I didn't study as hard as I really should've which is why I didn't pass my first time around but I should be fine on this next test. I hope for all your current students that if they really enjoy what they are learning, that they see living proof in me, that anything is possible with hard work and dedication. I believe that is someone finds in there a trade that suits them, that they really can take it out to the streets and build from there. I will never forget you, your instruction or the opportunity that you gave me. THANK YOU AGAIN, SO VERY MUCH!

Your Former Student,

Sabrina
